The middle class and working people are on the edge, and families need affordable health care, access to reproductive health, and good public schools. Republicans abandon them. House Republicans are leaving working families out to dry by attacking education at all levels, decimating access to job training, cutting funding for reproductive health, and abandoning ongoing health crises. With an 11 percent cut below 2024, Republicans’ 2025 Labor, Health and Human Services, and Education, and Related Agencies funding bill kicks teachers out of classrooms, harms women and children, and threatens the Social Security Administration’s operations. While Democrats help families make ends meet, keep people safe, and invest in our children, Republicans aim to eliminate services that keep families afloat.

Furthers Republicans’ Goal of Eliminating Public Education
- Decimates support for children in K-12 elementary schools by slashing Department of Education resources by $11 billion, 14 percent, below 2024, including cutting Title I Grants to Local Educational Agencies by nearly $5 billion.
- Cuts mental health support in schools while children struggle to access the services they need.
- Eliminates funding for English Language Acquisition and teacher training opportunities used to increase the number and improve the quality and effectiveness of teachers and school leaders.

Continues Assault on Women’s Health
- Eliminates funding for Title X Family planning and the Teen Pregnancy Prevention Program.
- Blocks funding for Planned Parenthood health centers and access to abortion and reproductive health services.
- Cuts programs that support maternal and child health, including eliminating Healthy Start.

Slashes Funding for the Social Security Administration
- Threatens to close field offices, extend retirement claims and wait times for seniors, and delay disability claims decisions by cutting funding for the Social Security Administration’s operating budget.

Abandons College Students and Hardworking Americans
- Leaves behind working people by cutting the Department of Labor by 22 percent including cutting the Employment and Training Administration by 25 percent.
- Slashes funding for Federal Work Study and the Federal Supplemental Educational Opportunity Grant program making it harder for students to access a college education.
- Eliminates Workforce Innovation and Opportunity Act Youth Job Training and drastically cuts funding for Registered Apprenticeships.
- Fails to protect workers’ wages, health, and safety by slashing worker protection agencies.

Surrenders to Ongoing Health Crises
- Cuts funding for State and local health departments while many across the country are struggling to tackle multiple, severe public health crises.
- Completely eliminates funding programs that address health crises including the Ending HIV Epidemic initiative, Rape Prevention, Suicide Prevention, Opioid Overdose Prevention and Surveillance, Tobacco Prevention and Control, and Firearm Injury and Mortality Prevention Research.
