

# STATE, FOREIGN OPERATIONS, AND RELATED PROGRAMS

## FISCAL YEAR 2027 FACT SHEET

**The Trump Doctrine is failure followed by failure. President Trump is pursuing a deadly, costly war with Iran that Americans overwhelmingly oppose and showing us the risks of failing to invest in diplomacy. House Republicans are following suit, further surrendering America's position as the leader of the free world.** Their 2027 State, Foreign Operations, and Related Programs funding bill weakens our national security, makes foreign assistance less effective and accountable, harms women around the world, and hinders our ability to address the climate crisis. **By proposing a nearly \$3 billion cut to the 2026 funding level, and a 20 percent cut from two years ago, Republicans are isolating America and promoting extremism, and that puts Americans at risk.**

### Threatens National Security by Abdicating U.S. Leadership

- Cuts \$400 million from International Humanitarian Assistance, and rescinding another \$1 billion, while the world experiences humanitarian crises on every continent of the world.
- Risks Americans' health and safety by eliminating funding for the United Nations (UN) regular budget, UN Development Program, UN Women, and UNICEF and prohibits support for the World Health Organization (WHO).
- Advantages adversaries, like Iran, Russia, and the People's Republic of China, by pulling out of international initiatives and shrinking the U.S. footprint overseas.
- Threatens international access to accurate and timely news, especially in closed societies like Russia, China, and Iran, by cutting funding for international broadcasting by \$68 million.

### Threatens Global Health and Women's Health

- Prohibits support for the United Nations Population Fund (UNFPA) whose work is critical to keeping women and girls safe and healthy.
- Slashes bilateral family planning by \$114 million, central to supporting women's health and addressing reproductive health issues and reinforces an expanded Global Gag Rule.
- Jeopardizes global health by reducing programs by \$532 million, abandoning American moral leadership on the world stage.

### Hampers the U.S. Response to the Climate Crisis

- Eliminates support for communities' ability to adapt to weather changes, sustainably manage their land and resources, and expand access to clean energy.
- Prohibits funding to the Clean Technology Fund and the Green Climate Fund as well as implementation of the Paris Agreement.
- Ignores connections between the environment, conflict, migration, and economic opportunity.

### Puts Americans at Risk by Catering to the Most Extreme Republicans

- Includes extreme partisan policy riders despite being continually rejected by both the House and the Senate, wasting time and continuing President Trump's chaos.
- Limits America's soft power by walking away from capable and effective partners such as the U.S. Institute of Peace, Inter-American Foundation, and United States African Development Foundation.
- Undermines our democracy by allowing disinformation and extremist views to flourish.
- Fails to adequately staff the State Department to properly implement and oversee assistance in the United States interest.
